Set-up account authentication. This process has you set-up a phone number to use to verify your identity when logging in on a new device.

AUTHENTICATION SETUP

Passwords are becoming increasingly easy to compromise. They can often be stolen, guessed, and hacked. Our new enhanced authentication improves the security of your online accounts by using your phone to verify your identity. This prevents anyone but you from accessing your accounts, even if they know your password.

You'll enter your username as usual, then use your mobile device to verify that it's you before entering your password.
